-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Applicants filing for Continuation In Part has been acknowledge, though no evidence of the claims presented on 12 September, 2003 suggested matter that would pertain to the parent application.

Drawings

2. The drawings are objected to under 37 CFR 1.83(b) because they are incomplete. 37 CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Please look at Figures 5A, 7A, 9A, 11A, 13A, 15A, 17A, 19A, 21A, 23A, 25A, 27A, 29A, and please note that these figures do not show an embodiment or enough information to illustrate the invention. Please look at a typographical error in Figure 6 "REOMTE".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. **Claims 1-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Luciano et al (US 6,758,393 B1), herein after Luciano.**

7. **Regarding claims 1 and 25,** Luciano discloses a remote gaming system with remote devices and a ticket or voucher system for cashless transactions being accessible by an attendant (user) via a mobile cart to be able to issue and redeem vouchers for the players without the players having to leave their machines, or walk all the way to the Cashiers Desk, (Abstract, Col. 10:54-59).

8. **Regarding claims 2-5 and 26-29,** Luciano discloses the use of a wireless LAN system to connect the mobile cashier terminal to the validation network system, Wireless LAN being known to be IEEE 802.11 a-g and alike, (Col. 3:67- Col.4:6).

9. **Regarding claims 6-10, 25, and 30-33,** Luciano discloses a preferred embodiment wherein the attendant interacts with the system via a keypad or touchpad, in a Windows environment, the validation system being the web client the user the attendant, they interact via prompts and user friendly query such as an easy to fill form for the attendant, (Fig. 13 and 17 and descriptions).

10. Regarding claims 11-17 and 34-40, Luciano discloses a host computer including a database for maintaining the player tracking system, (player account server), the remote network coupled to retrieve and store data, such as table, wherein databases are formed of tables and objects and data, and written in a user interface language appropriate for the attendants to read, (Col. 2:26-28).

11. Regarding claims 22-25 and 45-47, Luciano discloses a voucher with an ID number, a barcode, and a barcode reader, also discloses the need of entering these numbers manually in the event of failure of the barcode reader to work, (Fig. 12 and Col. 3:14-16).

Claim Rejections - 35 USC § 103

12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

13. Claims 18-21 and 41-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luciano in view of official notice.

14. Regarding claims 18-21 and 41-44, Luciano discloses all the limitations recited in claims 1 and 25 from which claims 18-21 and 41-44 depend on, although Luciano stays silent about the specific programming interface used to display information to the attendants. The examiner takes official notice that the use of JAVA servlets to interface with the attendants is well known as a user-friendly tool to help the employees communicate with complex computer systems, and that more and more programmers are turning to the use of JAVA menus and navigation panes. It would have been obvious to one of ordinary skill in the art to implement JAVA tools to the creation of user

friendly Windows for the employees to avoid data entry errors and overpaying the customer.

Citation of Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Rowe et al (US 6,892,182 B1) pertains to a ticket in ticket out system with wireless cashier validation terminals.
